The literature searches were done in May 2009, and the updates were done in March 2010 and March 2011. I've attached them below if you do want to publish them. The literature search done in 2009 has the references sorted by high priority for retrieval, low priority for retrieval, already cited in the tox review, not recommended for retrieval, and cancer related.

Wasn't there something about not putting up any new literature searches for awhile...I can't recall.

Do we have a literature search product that I can put on the web site?

Hello,

Kathy Raffaele wants to know if we can share arsenic non-cancer's bibliography with NIEHS Superfund research program.

They are thinking about putting together an arsenic workshop. Please see email below. The literature search product is not on the website.

Thanks, Janice

Hi Janice,

Good Morning!

Kathy wants to know if we could share the bibliography of the arsenic noncancer for the NIEHS Superfund research program. She understands the document is in the early stages. Do you have any thoughts? Please see the email request from her below.

Thanks.

Hi Kathy,

The draft cancer assessment is already in the web. Here is the website.
http://cfpub.epa.gov/ncea/iris_drafts/recordisplay.cfm?deid=219111

The noncancer assessment is being reviewed in house and has not gone to Agency reviewers. I think the draft may be too early to share. If you need bibliography alone, I need to check with Janice Lee at NCEA.

Santhini,

I know the arsenic assessment isn't out yet, but do you suppose it would be possible to share the bibliography with the NIEHS Superfund Research Program staff?

This relates back to the issue of potentially holding a workshop, and what the focus would be, etc., Whatever you think we can share with them will probably be helpful.

Thanks.

Kathy
